# CONTENTS OF VOL. XIII., SECOND SERIES.

## JANUARY, 1919

**Ionization and Excitation of Radiation by Electron Impact in Nitrogen.** BERGEN DAVIS and F. S. GOUCHER ..... 1
**On a Kinetic Theory of Magnetism in General.** KOTARO HONDA and JUNZO OKUBO ..... 6
**On the Theory of Superposed Diffraction-Fringes.** CHANDI PRASAD ..... 27
**On the Mechanical and Electrodynamical Properties of the Electron.** MEGH NAD SAHA. 34
**A New Experimental Determination of the Brightness of a Black Body, and of the Mechanical Equivalent of Light.** EDWARD P. HYDE, W. E. FORSYTHE and F. E. CADY ..... 45
**Ionization and Resonance Potentials for Electrons in Vapors of Arsenic, Rubidium, and Cæsium.** PAUL D. FOOTE, O. ROGNLEY and F. L. MOHLER ..... 59
**Energy of the Characteristic X-Ray Emission from Molybdenum and Palladium as a Function of Applied Voltage.** BENJAMIN ALLEN WOOTEN ..... 71
**New Books** ..... 87

## FEBRUARY, 1919

**With Further Reference to the Force between two Revolving Electrons at a Great Distance.** ALBERT C. CREHORE ..... 89
**On the Specular Reflection from Rough Surfaces.** T. K. CHINMAYANANDAM ..... 96
**Amplification of the Photoelectric Current by Means of the Audion.** CARL ELI PIKE .. 102
**The Emission and Absorption of Photoelectrons by Platinum and Silver.** OTTO STUHLMAN, JR. ..... 109
**Wallace Clement Sabine** ..... 134
**Proceedings of the American Physical Society** ..... 135

Minutes of the Ninety-second Meeting; Minutes of the Ninety-fifth Meeting; The Spectral Photoelectric Sensitivity of Molybdenite, *W. W. Coblentz and M. B. Long;* The Unique System of Units, *W. W. Strong;* A Simple Stretched Wire Dilatometer, *Arthur W. Gray;* Monochromatic and Neutral Tint Screens in Optical Pyrometry, *W. E. Forsythe;* The Temperature, Pressure and Density of the Atmosphere in the Region of Northern France, *W. J. Humphreys;* A New Type of Hot Wire Anemometer, *T. S. Taylor;* The Linear Thermal Expansion of Glass at High Temperatures, *C. G. Peters;* Some Characteristics of Glasses in the Annealing Range, *A. G. Tool and J. Valasek;* Preliminary Determination of the Thermal Expansion of Molybdenum, *Lloyd W. Schad and Peter Hidnert;* Speeds in Signaling by the Use of Light, *W. E. Forsythe;* Thermal Conductivity of Various Materials. *T. S. Taylor;* Further Observations on the Production of Metallic Spectra by Cathode Luminescence, *Edna Carter and Arthur S. King;* Residual Gases in Highly Exhausted Glass Bulbs, *J. E. Shrader;* A Device for the Automatic Registration of the $\alpha$- and $\beta$-Particles and $\gamma$-Ray Pulses, *Alois F. Kovarik;* Photoelectric Sensitivity vs. Current Rectification in Molybdenite, *W. W. Coblentz and Louise S. M. McDowell;* Absorption Coefficient of the Penetrating Radiation, *Oliver H. Gish;* Ionization and Resonance Potentials for Electrons in Vapors of Arsenic, Rubidium, and Cæsium, *Paul D. Foote, O. Rognley and F. L. Mohler;* Note on the Distribution of Energy in the Visible Spectrum of a Cylindrical Acetylene Flame, *Edw. P. Hyde, W. E. Forsythe and F. E. Cady;* Preliminary

343178

ary Note on the Luminescence of the Rare Earths, *E. L. Nichols, D. T. Wilber and F. G. Wick;* On the Critical Absorption Frequencies of Chemical Elements of High Atomic Numbers, *William Duane and Take Shimizu;* Some Interesting Results of Eclipse Magnetic Observations, *L. A. Bauer;* Why Clouds Never Form in the Stratosphere, *W. J. Humphreys;* The Minimum Temperature at the Base of the Stratosphere, *W. J. Humphreys;* Striæ in Optical Glass, *L. E. Dodd and A. R. Payne;* Effect of Crystal Structure Upon Sensitivity, *W. W. Coblentz;* Silvering Quartz Fibers by Cathodic Sputtering, *J. E. Shrader;* On the Characteristics of Electrically Operated Tuning Forks, *H. M. Dadourian;* A Mechanically Blown Wind Instrument, *A. G. Webster;* The Dynamics of the Rifle Fired at the Shoulder, *A. C. Webster;* Interior Ballistics, by a New Gun Indicator, *A. G. Webster.*

MARCH, 1919

**The Structure of Radioactive Elements.** INGO W. D. HACKH ..... 165
**On the Vibrations of Elastic Shells Partly Filled with Liquid.** SUDHANSUKUMAR BANERJI ..... 171
**The Relation of Potential Distribution to Hysteresis Effect in the Wehnelt Tube.** R. A. PORTER ..... 189
**Electric Discharge on the Surface of a Solid Electrolyte.** WAS. SULEJKIN ..... 197
**Magneto-striction with Special Reference to Pure Cobalt. Part I. The Wiedemann Effect.** HOWARD A. PIDGEON ..... 209
**On the Mechanical and Electrodynamical Properties of the Electron: Addendum.** MEGH NAD SAHA ..... 238
**New Books** ..... 240

APRIL, 1919

**On the Irregularities of Motion of the Foucault Pendulum.** A. C. LONGDON ..... 241
**On the Diffraction-Figures due to an Elliptic Aperture.** C. V. RAMAN ..... 259
**Refinements in Spherometry.** G. W. MOFFITT ..... 261
**The Automatic Registration of $\alpha$ particles, $\beta$ particles and $\gamma$ ray and X-ray Pulses.** ALOIS F. KOVARIK ..... 272
**Proceedings of the American Physical Society** ..... 281

Minutes of the Ninety-Sixth Meeting; Thermionic Amplifier, *H. J. Van der Bijl;* Water Vapor Pressure in Units of Force, *Alexander McAdie;* The Thermal Expansion of Living Tree Trunks, *C. C. Trowbridge (deceased) and Mabel Weil;* Pyrometer Absorption Glasses, *Paul D. Foote, C. O. Fairchild and F. L. Mohler;* The Measurement of Small Alternating Currents by Means of a Rayleigh Resonator, *F. R. Watson;* An Addition to the Theory of the Quadrant Electrometer, *A. H. and K. T. Compton;* Permanent-Contact Crystal Detectors, *Louise S. McDowell;* Are the Frequencies in the K Series of X-rays the Highest Frequencies Characteristic of Chemical Elements, *William Duane and Takeo Shimizu;* The Spectral Photo-electric Sensitivity of Silver Sulphide, *W. W. Coblentz and H. Kahler;* The Crystal Structure of Carborundum, *A. W. Hull;* A Possible Relation between the Resonance Potential and Specific Inductive Capacity of a Metallic Vapor and its Properties in the Solid State, *K. T. Compton;* The Law of Absorption of High Frequency Radiation, *Arthur H. Compton;* Collisions of Slow Moving Electrons with Nitrogen Molecules, *S. Karrer;* The Ionizing Potentials of Argon, Neon and Helium, *H. C. Rentschler;* Note on the Use of the Hot Cathode Vacuum Tube for the Measurement of Voltage, *Lynde P. Wheeler;* An Interferential Method for Measuring the Expansion of Very Small Samples, *C. G. Peters and Irwin G. Priest;* The Properties of the Electron as Derived from the Chemical Properties of the Elements, *Irving Langmuir;* Some Physical Properties of Dental Materials, *C. G. Peters and W. H. Souder;* The Origin

of the General Radiation Spectrum of X-Rays, *David L. Webster;* Note on Bomb Trajectories, *Edwin B. Wilson;* On the Relation between the K Series and the L Series of X-Rays, *William Duane and Takeo Shimizu;* Temperature Coefficient of Resistance of Molybdenum, *E. C. Blom;* Some Photoelectric Lecture Experiments, *Jacob Kunz;* On the Measurement of the Detection Coefficient of Thermionic Vacuum Tubes, *H. J. Van der Bijl;* A New Formula for the Spectral Distribution of Energy from a Complete Radiator, *Irwin G. Priest;* On the Measurement of the True Barometric Pressure in a Rapidly Moving Current of Air, *J. G. Coffin;* The Function of Phase Difference in the Binaural Location of Pure Tones, *R. V. L. Hartley.*

MAY, 1919

**An Optical Lever Manometer.** J. E. SHRADER and H. M. RYDER ..... 321
**The Logarithmic Law Connecting Atomic Number and Frequency Differences in Spectral Series.** GLADYS A. ANSLOW ..... 326
**On the Characteristics of Electrically Operated Tuning Forks.** H. M. DADOURIAN .... 327
**The Mathematical Structure of Band Series II.** RAYMOND T. BIRGE ..... 360
**The Passage of Photoelectrons Through Metals.** K. T. COMPTON and L. W. ROSS .... 374
**New Books** ..... 392

JUNE, 1919

**The Function of Phase Difference in the Binaural Location of Pure Tones.** R. V. L. HARTLEY ..... 373
**An Extension of the Electron Theory of Metals. I. Thermoelectricity and Metallic Conduction.** A. E. CASWELL ..... 386
**The Audion as a Circuit Element.** H. W. NICHOLS ..... 404
**Thermionic and Photo-electric Phenomena at the Lowest Attainable Pressure.** C. F. HAGENOW ..... 415
**Residual Gases and Vapors in Highly Exhausted Glass Bulbs.** J. E. SHRADER ..... 434
**The Joule-Thomson Effect for Air at Moderate Temperatures and Pressures.** L. G. HOXTON ..... 438
**Errata** ..... 480
